Subject: follow up from chlormequat chloride call - registration review data

Hi Jessica and Juli:

I wanted to follow up regarding the registration review discussion that came up at the end of our call yesterday. The docket ID# on www.regulations.gov for chlormequat chloride is EPA-HQ-OPP-2015-0816. The GDCI that went out to all of the current technical chlormequat chloride registrants is loaded under Supporting Documents. It was issued on Feb 12 of this year. Some of the studies are due in 12 months and some in 24. You stated that you will be resubmitting your technical and end-use product again in April 2020. That means (barring any time extensions) that the studies that take 12 months to conduct and submit will have been due two months prior to your submittal. So you will be on the hook for those studies. You will need to submit the MRIDs for those studies with your application (whether they are your studies or you pay another registrant to cite them is up to you). For the studies that are 24 months (due Feb 2021), you will need to state in your application HOW you plan to satisfy those studies. Those studies will also come due before your PRIA due date for your application (the R150 code is 21 months so the 24 month studies will be due prior to your PRIA due date), so they will need to be submitted before your application is approved (and by the due date). I don't know if you are planning on creating a Task Force with the other technical registrants or not, or entering into any data sharing agreements but you'll want to sort that out soon since the DCI went out already.

You also asked for the list of EPA employees on the call. They are: Cynthia Giles-Parker, Lindsay Roe, Jean Holmes, Katrina White, Karen Milians, Cameron Douglass and me.

When you send the meeting minutes to us please include this post-call follow up information regarding registration review so that it is clear for the record.

If you have any questions and want to discuss let me know so I can give you a call.

Thanks,
Heather
